It's a common mistake to think that a noob is just someone who is new to a field. In reality, a noob is someone who lacks the necessary skills and knowledge to perform a task. This is often the case with people who are just starting out in a new career or hobby. They may have a lot of enthusiasm and energy, but they lack the experience and expertise that comes with time and practice. This is why it's important to be patient and supportive when helping someone who is a noob. They need time to learn and grow, and they need someone who can guide them through the process. It's also important to remember that everyone starts as a noob at some point in their life. We all have to learn and grow, and we all need someone to help us along the way. So, if you're a noob, don't be discouraged. Just keep learning and practicing, and you'll eventually become an expert in your field.
